

VIDA VERDE CENTRO DE ESPAÑOL

Website Redesign Specification

Prepared for Ongshak Development Team

To be used alongside: Website Redesign Strategy (v4) and Segment 1 SOW

Prepared by: Jeremy / Vida Verde Advisory · May 2026 · Confidential

How to Use This Document

This specification defines the content, copy direction, and functional requirements for every page of the redesigned Vida Verde website. It is the primary reference for Ongshak during Phase 1.2 (Figma design) and Phase 1.3 (development and integration).

Layout and visual design decisions are intentionally left to Ongshak's designers. This document specifies WHAT each page must contain and DO, not how it should look.

Where suggested headline or CTA copy is provided, treat it as directional — the intent and tone must be preserved, but wording may be refined during Phase 1.1 discovery.

Sections marked [VIDA VERDE TO SUPPLY] require content or assets from Rosa and Mateo before development can begin. These should be flagged and collected during Phase 1.1.

1. Site Architecture

1.1 Navigation Structure

The primary navigation must be simplified from the current 14+ item structure to a maximum of 5 top-level items. Every item must lead to a conversion action within 2–3 clicks.

Nav Item	URL	Purpose	Primary CTA
Online Classes	/online-classes	Primary product page. Entry point for the primary audience segment.	Book Your First Lesson
Study in Quito	/study-in-quito	Overview of all in-person and immersion programs.	Inquire / Book a Program
Travel Spanish	/travel-spanish	Dedicated page for Ecuador-bound travellers wanting conversational or travel Spanish. Future ad campaign landing page.	Plan My Travel Spanish
Our School	/our-school	School history, AECEE certification, team, and ethos.	Meet Our Teachers
Contact	/contact	Contact form, WhatsApp link, location map.	Send a Message / WhatsApp

The language toggle (English / Español) appears in the top navigation bar as a persistent element, not buried in a footer. URL structure for the Spanish version should use a /es/ prefix (e.g. /es/clases-en-linea) to preserve SEO value for both languages.

2. Global Elements

These elements appear on every page of the site and must be consistent, accessible, and fully functional across all device sizes.

2.1 Header / Navigation Bar

- Vida Verde logo (left-aligned) — links to homepage
- Primary nav items: Online Classes, Study in Quito (sub: Quito Immersion, Travelling Classroom, Puerto López, Homestay), Our School, Contact
- Language toggle: EN | ES (right side of nav, persistent)
- Primary CTA button in nav: “Book Your First Lesson” — this button must be visible at all times on desktop
- On mobile: hamburger menu with the same items. The CTA button collapses into the menu.
- Nav bar should be sticky (remains visible on scroll)

Suggested Nav CTA Copy

“Book Your First Lesson” (links to /online-classes/book)

2.2 Footer

- School name, tagline, and AECEE certification badge
- Quick links: Online Classes, Study in Quito (sub: Quito Immersion, Travelling Classroom, Puerto López, Homestay), Our School, Blog, Contact, Privacy Policy, Terms
- Contact block: email address, WhatsApp number, physical address (La Floresta, Quito)
- Social media icons: Instagram and Facebook only (if active) — no Twitter/X, no LinkedIn unless confirmed active
- Copyright line: © 2026 Vida Verde Centro de Español. All rights reserved.
- Language toggle repeated in footer

Note for Ongshak

Twitter/X and LinkedIn links from the current site should NOT be carried forward unless Vida Verde confirms those channels are actively maintained. Dead social links undermine credibility.

2.3 Floating WhatsApp Button

- Persistent floating button, visible on all pages and all scroll positions
- On click: opens WhatsApp with pre-filled message: “Hi, I'd like to find out more about Vida Verde's Spanish classes.”
- Should not obstruct key page content or CTAs on mobile
- WhatsApp number: [VIDA VERDE TO SUPPLY]

2.4 Trust Bar

A compact horizontal bar displaying key credibility signals. Must appear on the homepage (below the hero CTA) and optionally on the Online Classes page.

- AECEE Certified
- Est. 1999
- 4,700+ Students
- All Levels Welcome
- Classes via Google Meet

3. Page Specifications

3.1 Homepage (/)

The homepage serves all three visitor segments but is optimised for the primary segment: online Spanish learners. Every section must advance a visitor toward one of the three primary CTAs. Sections are listed in recommended scroll order.

Section A — Hero

Homepage — Hero	Section A
-----------------	-----------

Element	Specification
Purpose	Immediately communicate what Vida Verde is, establish trust, and drive the primary CTA
Primary CTA	“Start for \$12 — Book Your First Lesson” → links to /online-classes/book
Secondary CTA	“Explore All Programs” → links to /study-in-quito
Trust bar	Appears directly below the CTA buttons: AECEE Certified · Est. 1999 · 4,700+ Students · All Levels Welcome · Classes via Google Meet

Section B — Why Vida Verde?

Homepage — Why Vida Verde?	Section B
----------------------------	-----------

Element	Specification
Purpose	Differentiate Vida Verde from app-based competitors (Duolingo, Babbel) and freelance marketplaces (iTalki, Preply)
Format	3–4 differentiator cards or blocks, each with a short headline and 1–2 sentence description
Section headline	“More than an app. More than a freelancer.”

Suggested differentiator headlines and copy:

Headline	Supporting Copy
 A Real School, Not a Platform	Vida Verde has been teaching Spanish since 1999. AECEE-certified, structured, and accountable — not a marketplace of strangers.
 Expert Native Teachers	Every teacher is a university-trained Ecuadorian native speaker with years of classroom experience. Not a hobbyist. Not a part-timer.
 Personalised to You	No fixed syllabus. Your teacher adapts every lesson to your level, goals, and pace — whether you're a complete beginner or polishing your fluency.
 Learn Anywhere	Classes via Google Meet. Real conversation, real feedback, real progress — from your living room, office, or café.

Stats block	4 key numbers displayed prominently: 4,781 Students Taught · 356 Courses · 25+ Years · AECEE Certified

Note on Testimonials

Generic testimonials (“Great school!”, “I loved my teacher”) do not convert. Each testimonial must describe a specific outcome:

“After 8 weeks with Lucía, I was able to hold a full conversation with my partner’s family in Guayaquil.”

“My teacher helped me prepare for a job interview conducted entirely in Spanish. I got the job.”

If existing testimonials are generic, Vida Verde should reach out to past students to request updated, outcome-specific versions before launch.

Over 4,700 students from every corner of the world have had that experience with us — online and in person. 3.2 Online Classes Page (/online-classes)

3.10 Blog (/blog)

The blog is a long-term SEO and content marketing asset. At launch, the structure should be in place but content population is a post-launch activity. Ongshak should build the blog infrastructure and migrate or replace any existing posts from the current site.

Element	Specification
Blog index	Card-based grid: post thumbnail image, title, date, category tag, excerpt (1–2 sentences), “Read More” link.

School address	[VIDA VERDE TO SUPPLY — full street address]

4. Functional Requirements

4.1 Booking System

Requirement	Specification
Scheduling	Teachers must be able to set their own availability. Students see only available slots. Timezone auto-detection on student side is essential — Ecuador is GMT-5.
Booking options	Recommend Calendly (Teams or higher), Acuity Scheduling, or a custom booking module. [Vida Verde to confirm preference — see Open Questions in Strategy doc]
Payment on booking	Payment is captured at time of booking, not after. No “pay later” option for the discounted first lesson or packages.
Cancellation / reschedule	Policy to be defined by Vida Verde. Suggest: free reschedule up to 24hrs; cancellations within 24hrs forfeit the booking fee. Clearly displayed before payment.
Teacher notifications	Automatic email to teacher on new booking: student name, level, date/time, Google Meet link.
Student confirmation	Automatic email to student: booking summary, teacher name, Google Meet link, prep guide PDF attachment.

4.2 Payment Gateway

Requirement	Specification
Recommended gateway	Stripe (subject to Ecuador-specific availability and banking considerations). Alternatives: PayPal, Wise Payments, or local gateway if preferred. [To be confirmed with Ongshak and Vida Verde before Phase 1.3]
Accepted methods	Credit card (Visa, Mastercard), debit card, Apple Pay, Google Pay
Currency	USD (primary). Consider displaying local currency equivalents where feasible.
Security	PCI-compliant processing. Stripe handles all card data — card numbers never touch Vida Verde’s servers.
Receipts	Automated payment receipts emailed to student on successful payment.
Refunds	Refund capability must be accessible to Vida Verde admin without requiring developer intervention.

4.3 Lead Capture & Email Automation

Requirement	Specification
Email platform	Recommend Mailchimp (free up to 500 contacts) or Brevo. [Vida Verde to confirm if existing list/CRM exists]
Tier 1 flow (free resource)	1. Visitor submits name + email on homepage form. 2. Auto-send PDF download link email. 3. Add to “Prospect” list. 4. Trigger nurture sequence

Requirement	Specification
	(below).
Nurture sequence	Email 1 (Day 0): Welcome + PDF link. Email 2 (Day 3): “How to choose the right Spanish teacher” (value content). Email 3 (Day 7): Testimonial + “Book your first lesson for \$12” offer. Email 4 (Day 14): Final nudge with urgency (e.g. “Limited teacher availability”).

A Note to Ongshak's Design and Development Teams

This specification has been developed in parallel with the Website Redesign Strategy document, which provides the strategic rationale behind every requirement listed here. If any requirement in this spec seems unclear or arbitrary, the Strategy doc will explain the

“why” behind it.

The most important single decision in this project is the first-page experience for an online Spanish learner: they must know within 5 seconds what Vida Verde is, why it’s better than an app or a freelance teacher, and what to do next. Everything else in this spec serves that moment.

We welcome Ongshak’s input on technical feasibility, platform choices, and implementation approach throughout Phase 1.1. This spec is a starting point for that conversation — not a closed brief.
