

Copy Deck v2 — Review Findings

Copy Deck v2 checked against Website Spec v2.2 and the Review Checklist · Prepared by Connor · July 2026

Overall: the copy deck is in good shape — coverage matches the spec's page structure, tone follows the strategy doc, and the placeholders align with the To-Supply tracker. Below are the issues found, ordered by severity. Items in Section A are outright errors; Section B is missing copy; Section C is deliberate wording drift the spec permits but that Jeremy should consciously sign off; Section D notes on the emails.

A. Errors — fix before this goes to Figma

Ref	Issue	Fix
A1	Contact form subject dropdown lists 'Travel Spanish' TWICE (options 3 and 4) and is missing 'Homestay'. Spec 3.11 requires: Online Classes / Immersion Programme / Homestay / Travel Spanish / Other.	Change option 4 to 'Homestay'.
A2	AECEE is expanded as 'Association of Centres of Spanish as a Foreign Language' with a link to aecee.es. Both are wrong: AECEE is the Asociación Ecuatoriana de Centros de Enseñanza de Español (Ecuadorian Association of Spanish Language Centers), and its site is ecuadorspanishschools-aecee.com — aecee.es is a Spanish domain, not Ecuadorian. The deck also uses a different expansion in the footer section ('Association of Spanish Language Schools'), so it's internally inconsistent too.	Use the correct Ecuadorian name and URL everywhere (footer 1.2, Our School section 9). Note AECEE was created in 2009 — avoid any copy implying 25 years of certification.
A3	20-Class Package price: spec says \$250.00, copy deck says \$254.64 (both marked confirm). Two different numbers will end up in Figma unless reconciled.	Get the real price from Rosa/Mateo and update BOTH documents to match.
A4	Response-time promises conflict. Spec Contact page: 'within 48 hours'. Copy deck: 'within 24 hours' on Contact, Study in Quito enquiry, and Travel Spanish. A 24h promise the school can't keep is worse than an honest 48h.	Ask Rosa/Mateo what's realistic; use one number everywhere.
A5	Student stats inconsistent: spec homepage stats block says 4,781 Students Taught; copy deck uses 4,700+ throughout. Either is fine — mixed usage isn't.	Pick one (4,700+ reads cleaner and doesn't age) and align both docs.
A6	Lead-capture Email 1 says the guide 'is attached to this email' but the CTA button says 'Download Your Guide →' and the spec (4.3) specifies delivering a download LINK.	Make it a link, drop 'attached'. Links avoid spam filters and let GA4 count downloads.

B. Missing copy — the deck skips these spec requirements

Ref	Gap	Suggestion
-----	-----	------------

B1	Study in Quito Homestay Preview (spec 3.5 Section C) has no copy at all — the deck jumps from Programme Cards (B) straight to Enquiry CTA (labelled D). The spec requires 2-3 sentences + 'Learn About Homestay →' CTA.	Draft exists in the SPEC's suggested copy box ('The best Spanish classroom isn't a classroom at all...') — lift it into the deck as section 5.3.
B2	Footer quick links: spec 2.2 requires a quick-links column (Online Classes, Study in Quito + subs, Our School, Blog, Contact, Privacy, Terms). Deck 1.2 has tagline/contact/social but no quick-links labels.	Add the link labels to deck section 1.2.
B3	GDPR consent checkbox: spec 4.3 requires 'I agree to receive emails from Vida Verde. View our Privacy Policy.' on email-capture forms. Deck has only a soft privacy note.	Add the checkbox copy to lead capture (2.7) and blog widget.
B4	Programme detail pages: only Quito Immersion is drafted; Travelling Classroom, Puerto López, and Jungle are 'adapt the template'. Fine for now, but nobody owns writing them.	Assign: who adapts the template for the other 2-3 programmes, and by when?
B5	Blog page: no copy for the blog index (headline, category labels: Spanish Learning Tips, Ecuador Travel, School News, Student Stories, Culture & Language) or the post-footer lead-capture widget.	Small — add a section 10b with index headline + the five category names.
B6	Privacy Policy and Terms pages have no copy and no assigned owner, but the spec makes them launch requirements (payments + email capture).	Flag to Ongshak: template legal copy or does Vida Verde source it?
B7	Spanish translations: spec 4.4 requires full ES versions of every page; the deck is EN-only and responsibility is still 'to be agreed'.	Surface at the next Ongshak call — translation is a big, unowned work item.

C. Wording drift — allowed by the spec, but sign off consciously

Ref	Spec version	Copy deck version
C1	Our School H1: '25 Years. 4,700 Students. Lasting Connections.'	'A Family School. 25 Years of Spanish.' (arguably better — but pick one)
C2	Contact H1: 'Start the Conversation.'	'Let's Talk.'
C3	Course selector card CTAs: 'Book Your First Lesson' / 'Contact Us for a Custom Plan' / 'Download Free — No Commitment'	'Get Started →' / 'Plan My Trip →' / 'Download Free →'
C4	Booking level dropdown: 4 options (None/Beginner/Intermediate/Advanced)	5 options incl. 'Upper intermediate' (better UX — tell Ongshak the deck version wins)
C5	Lead capture headline: 'Not Sure Where to Start? Get Your Free Spanish Guide.'	'Not Sure Where to Start?' with the guide moved to the subheadline
C6	Study in Quito hero mentions the Amazon ('a journey deep into the Amazon')	Deck says 'along the Pacific coast' — correct caution while the Jungle Programme is unconfirmed; revert only if Jungle is confirmed active

D. Emails — checked, two small notes

The nurture sequence (Day 0/3/7/14) and post-booking sequence (immediate/24h-before/1h-after) match the spec's timing and intent exactly, and the voice is right. Two notes: Email 4's 'limited availability' urgency claim should be true before it ships — check with the school that teacher slots do actually fill; and Email 3 has a testimonial placeholder that depends on the 5 outcome-focused testimonials in the To-Supply tracker, so it will block if those don't arrive.

Verdict

Nothing here blocks Figma work except A1–A3 (a form bug, a factual error about AECCE, and a price conflict). Fix Section A, lift the missing homestay-preview copy from the spec (B1), and assign owners for B4–B7. Everything in Section C is a judgement call Jeremy can settle in one pass with tracked changes, exactly as the deck's own instructions request.
